“ I worked with Quinten in the PC Fab at HP in Loveland. Quentin helped us run newly developed test experiments over and above his normal job responsibilities. He made a name for himself learning and running the test, and being thorough and dependable. Above all, when I think of Quentin, I remember so vividly his smile, his quiet composure, and always willingness to help. It's such a blessing to have known him. A thorough professional and a gentleman.

“ I worked with Quentin in the PC Shop Manufacturing Department for many years. He was always someone I enjoyed working with to solve production problems. Quentin was so steady, calm and rational about any particular issues that needed solutions. He was someone I could always count on. He will be missed by many.
